Description

- The Excalibur Knights of the Round Table is a quest involving among the highest degree of know-how in all what a watch can offer: design, technique and exclusivity. The very recognisable face of the watch is made of twelve micro-sculpture - the Knights - placed around a dial - the Table. The Knights are handcrafted and represent the 12 characters involved in the quest. The table is made of gems or precious materials or materials requiring specific techniques, and symbolizes the unity and equality of the Knights. Underneath the face of the watch is an automatic calibre, manufactured in the Roger Dubuis workshops and certified by the Poinçon de Genève, one of the most demanding certifications in Haute Horlogerie.
